Comment by inventor and visionary John Kenneth Hutchison on the film QPM - Part - 1

John Hutchison is known for his famous experiments on levitation and electromagnetically induced invisibility and dematerialisation. In addition he managed to build closed-looped and self-running crystal wafer-cells that extract energy from the quantum vacuum by unbalanced means.

John Kenneth Hutchison

Brilliant presentation by Marcus Reid. His presentation QPM – Part - 1 clearly shows what I have seen along with other scientists Ken Shoulders and Dr. Peter Kokoschinegg in Austria.

This is worthy of a viewing by Prince Hans Adam-II of Lichtenstein, who has for many years been searching out for free energy with George Hathaway and Dr. Harold Puthoff. All above mentioned names are friends of mine for a long time.
